**Subject:** Fw: Region 6 Gold Kind Scribe Projects

FYI, trying to keep you out of the weeds as much as possible, but more on the discussion I had with Janine below. Trying to get ahead of combo subscription issues. Not sure how important it is that R8 sampling and analytical projects appear as one scribe project in a combo subscription.

Either way, one combo for all 6 projects will get all the data into one set of SQL tables which I think is what Janine/Weston really wants.

Frank

Hello Janine,

Also as we discussed, a couple of other items to check before we do the Combo:

\*This one we should do\*

1) The R9 Gold King analytical project has not been published yet.

Before they publish, Please make sure the Site # for this Project is: **R9080515** This is the Site # used by PID 2640 R9 Gold King Mine Operations Project. This way in combo subscriptions, the data will appear as one Scribe project.

\*This one you might want to consider doing\*

2) The Two R8 PIDs Ops and Analytical have different Scribe Site #s. Therefore, they appear as separate projects in the Scribe UI when viewed in Scribe in a Combo subscription. This is technically fine, just wanted to mention it now in case this is something that you might want to change now before we get too far along.

Pros: When viewed in a Scribe combo subscription, the data for the two R8 projects will appear as one Scribe project.

Cons: The Scribe.NET PID for the R8 Analytical Project would have to be reset so that it could be added to the Combo subscription. There will be a new PID for the R8 Analytical Project. We would add the new PID to subscriptions as needed (USEPA Region 6, 8, 9, etc..)

Steps to change the Site # in the R8 Analytical project and publish to Scribe.NET:

- a) Open the R8 Analytical project in Scribe
- b) Change the Site # to **A8K9**. To do this, click on the Site Name in the top left corner and enter the Site #
- c) From the file Menu selection Options, Reset the Scribe.NET Project ID
- d) Publish to Scribe.NET

Hello Janine,

To prepare for inclusion on the Gold King Mine Combo subscription, please update the R6 Gold King Analytical Scribe project as follows:

From Scribe, open the Gold King Analytical Scribe project

- 1) Delete All the Sampling Location Records
- 2) Delete All the Property Info Records
- 3) Reset the Scribe.NET Project ID. From the File Menu, select Options and click the Reset Scribe.NET Project ID button
- 4) Publish the project to Scribe.NET

Thanks,

Frank

Hello Janine,

OK great.

For the combined subscription, yes better if we can wait until the samples in the analytical project get added to the ops project and removed from the analytical project. Then change the Site # in the Analytical Project and publish. We'll then create a combined subscription for the two projects.

\*After removing the samples/locations from the analytical project and changing the site #, it may be best to Reset the Scribe.NET Project ID for the analytical project. To do this, from the Scribe File Menu, Select Options and the Reset Scribe.NET Project ID. The publish to Scribe.NET. We will use that PID for the Combined subscription and also add to your USEPA Region 6 subscription, etc..

Thanks,

- 1) Yes, we are going to remove those and put them in ops project, just haven't gotten there yet.
- 2) We will update the Site # on our next publish so we can combine tomorrow then instead of tonight.

Thanks for all your help!

**Subject:** Re: Region 6 Gold Kind Scribe Projects

Hello Janine,

Regarding the combined subscription:

- 1) The analytical project (Project ID 2645) contains a couple of Water Samples and Sampling locations. Is this project just supposed to contain Analytical Results?

2) For the Combined subscription for Project ID 2641 and 2645, for the combined Operational and Analytical data to appear as One site/project within the Scribe UI, the Scribe Site #s need to be the same. If the Scribe Site #s for the two Scribe projects in the Combined Subscription are Not the same, there will be two Scribe projects in the combined subscription. To edit a Scribe projects Site #, open the project in Scribe, click on the Site Name in the top left part of Task Bar and edit the Site # in the Site Info Form.

Just wanted to check on the above before finalizing the combined subscription. Let us know if we should go ahead and create the combined subscription or if you have any questions.

Thanks

Finally, PID 2641 and 2645 have been added to the USEPA Region 6 subscription.

Thanks

**Subject:** Region 6 Gold Kind Scribe Projects

ERT,

Can you create a combined R6 project for the Region 6 Operations (2641? – published by Corey Bercher) and Analytical (PID 2645 – published by Tom Walzer) SCRIBE datasets.

Can you then send us subscription information for:

1. Operations
2. Analytical
3. Combined

All three should be added to our Region 6 Subscription as well.

Can you reply all to this email so everyone cc'd gets this information.

Thanks.
